WOVEN**FLOORING**BY DICKSON

WOVEN**FLOORING**BY DICKSON

The Dickson Woven Flooring collection stands for expertise and attractive, innovative designs. Priding ourselves on our workmanship, we're convinced of the benefits of innovation and continuously drive the performance of our products.

With the new BORÉAL collection, the Dickson Design Studio invites you to explore new dimensions and re-enchants the aesthetics of resilient floor coverings with fifteen new references. It is also a major turning point as it is the first biosourced collection from Dickson Woven Flooring with the introduction of two new yarn colours made from natural and renewable materials, thus initiating the gradual transition towards environmentally-friendly alternatives.

To best meet your needs, our Research & Development team is working on simple, gradual improvements as well as revolutionary advances such as our CleanGard - Integrated Protection technology: a polyurethane (PU) coating directly integrated into our woven floors. We are proud to be the first and only company to offer this innovation exclusively on the market.

Dickson woven floor coverings enhance a multitude of public spaces: offices, shops, restaurants, educational establishments and leisure facilities throughout the world. Our renowned customers include, for example, Dior, EY and Bouygues Challenger. References that testify to our expertise and excellence.

CONTENTS

INNOVATION

DICKSON:

A POLYURETHANE COATING

WOVEN FLOORING THAT'S MORE **DIRT RESISTANT & EASIER TO CLEAN**

The CleanGard technology adds a protective overlay to the woven surface, delaying its soiling while enhancing its stain resistance and ease of maintenance.

OPTIMAL PROTECTION

The PU coating is integrated directly into the finished product, providing additional protection and ensuring that the material looks the same. CleanGard technology is odourless and contributes to a healthy interior.

THICKNESS

The product maintains its original performance including a total thickness of 4 mm, all layers combined

TRANSPARENCY

CleanGard technology does not affect the appearance of the product, which retains its attractive design

EASY MAINTENANCE

Much easier maintenance for less regular routine cleaning

58% WATER CONSUMPTION SAVED WITH THE NEW MAINTENANCE SCENARIO

A STEP TOWARDS BIOSOURCING

TOWARDS A MORE HARMONIOUS AND CIRCULAR ECONOMY

At the dawn of an era in which our world must make a commitment, our Research & Development engineers have begun redesigning our product by replacing some of its yarn components with materials of plant origin, thus marking our commitment to a sustainable and responsible future. Dickson Woven Flooring is pursuing its ambitious mission to replace conventional raw materials derived from fossil fuels with bio-based alternatives.

100% BIOBASED YARNS BY 2026

The Boréal collection marks a turning point, beginning the gradual transition to environmentally-friendly alternatives. This evolution is taking place progressively as we restock, with yarns made from natural and renewable materials. This improvement in our product is part of our commitment to significantly reducing our carbon footprint, since the woven top layer is made up of 33% bio-sourced material.

DICKSON

WOVEN FLOORING

THE LOOK AND FEEL OF TEXTILE WITH **TOTALLY UNIQUE PROPERTIES**

Woven from revolutionary fibres, Dickson® floor covering options combine the remarkable durability of vinyl with the aesthetic appeal and texture of traditional carpeting.

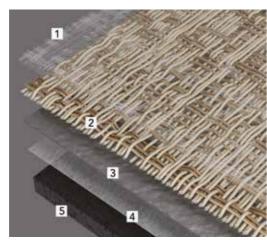

A truly innovative technology developed for the most demanding environments such as hotels, offices, stores and restaurants, Dickson flooring is durable, comfortable, attractive, and easy to maintain. This performance is further enhanced by CleanGard technology: a polyurethane coating incorporated into the woven wear surface for added protection and easier cleaning.

WOVEN WEAR SIDE WITH PU COATING

1. PU-coated woven wear side

HIGH-TECH BACKING

- 1. Polyurethane surface protection
- 2. Woven monofilament wear layer
- 3. Very high density foam
- 4. Fibreglass layer
- 5. Acoustic vinyl underlay (18 db/aw 0.05)

GLOBALLY RECOGNIZED QUALITY

Crown jewel of the technical textile industry, Dickson is now recognized the world over as the benchmark for supreme quality indoor and outdoor French-made fabrics. Its products, marketed under two flagship brands, DICKSON® and SUNBRELLA®, are used by the top names in design, architecture and boating.

The group's main growth engine—innovation—enables Dickson to constantly provide a diverse array of products and a wide range of technical and designer textiles, all aimed at improving people's homes and work environments. The company currently provides solutions for four key markets: solar protection, outdoor living spaces, indoor and outdoor decoration, and boating equipment. A combination of technical expertise and creativity, the Dickson style shines in more than 110 countries on 5 continents.

MADE IN FRANCE

COMFORTABLE & DURABLE

FLOORS PLAY A KEY ROLE IN THE COMFORT OF A ROOM

To ensure optimum convenience and well-being, our R&D team has created ultra-smart flooring solutions using advanced technology: thermal and acoustic insulation, a non-slip surface that's comfortable to walk on...

EXCEPTIONAL ACOUSTIC INSULATIONCAPABILITIES

A leading-edge innovation, the SoundGuard® technology was specifically designed to improve comfort and noise absorption.

Dickson developed a high performance soundproof backing that effectively absorbs ambient noise and significantly reduces the transmission of impact noise.

Acoustic comfort is truly essential to people's well-being and ideal for offices and hotels.

NON-SLIP SURFACE

The woven structure of Dickson® flooring naturally prevents slipping, making it particularly appropriate for public buildings where safety standards often determine the materials decorators can use.

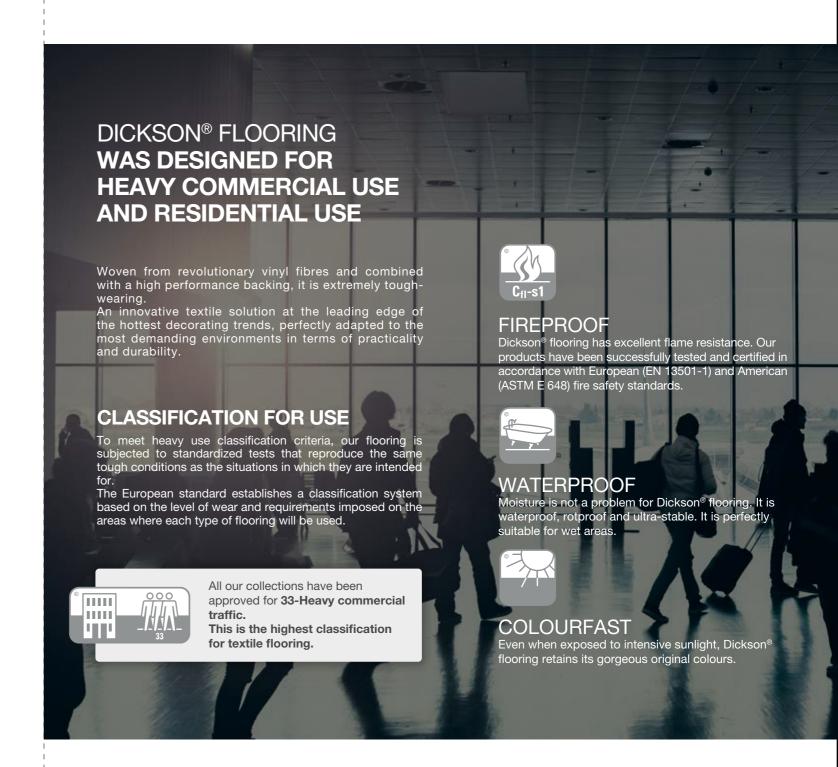

QUALITY THERMAL INSULATION

Good quality thermal insulation can dramatically improve the comfort of a room. Unlike hard flooring, Dickson® flooring offers warmth for greater well-being and energy savings.

ANTISTATIC PROPERTIES

Formulated to minimize static electricity generated from walking on most carpeting, Dickson® flooring solutions provide effective protection against unpleasant shocks.

EASYTO INSTALL & TO MAINTAIN

DICKSON® WOVEN FLOORING IS FAST AND SIMPLE TO INSTALL ON ANY KIND OF SURFACE

Like any other flexible flooring, installation is done by gluing the material directly to any kind of flat, clean, dry, stiff surface. To save time and increase flexibility, you can also install the tiles with a non-permanent glue.

THE FIRST WOVEN VINYL FLOORING ENSURING A CLEAN CUT

The FrayGuard® technology developed by Dickson minimizes the common phenomenon of fraying when cutting carpeting and boosts durability of the weave. It guarantees clean-cut edges for fast, efficient, impeccable installation.

DICKSON WOVEN FLOORING ALLOWS USERS TO ACHIEVE A CLASSIC LOOK OR CREATE ORIGINAL LAYING COMBINATIONS BY MIXING PRODUCTS TO CREATE RHYTHMS, PERSPECTIVES AND REFLECTIONS THAT TRANSFORM INTERIORS DEPENDING ON THE INTENSITY OF THE LIGHT.

STAIN RESISTANT

Dickson® flooring was designed to resist stains by not absorbing liquids and thus making spills quick and easy to clean.

LOW MAINTENANCE

The product takes less time to clean and requires less regular routine maintenance. As with linoleum or tiling, basic cleaning can be done with a vacuum, broom and warm water mixed with a neutral detergent.

SMART TIP

The colour of your flooring directly affects the maintenance requirements. Dirt and stains are less visible on chiné (marbled) shades than solid colours (whether light or dark). Depending on the location and the amount of traffic, this is an important aspect to consider when making your selection.

Although the structure of the weave makes it appear to have a certain relief element, the exclusive assembly process used by Dickson guarantees it is absolutely waterproof, dustproof and stainproof. The warp and weft yarns are heat-sealed together and assembled to the backing while they are still hot and coated with a polyurethane coating.

Dickson® woven flooring ensures optimal quality sanitary conditions. Rotproof, antibacterial, and impervious to dust mites, mould spores and fungus, the impermeable surface is strengthened with a polyurethane surface protection to make the hygienic maintenance of floors easier and avoid hard-to-remove stains such as coffee, wine, fruit conserve and blood.

See our detailed recommendations for care and maintenance of our floor coverings at

dickson-constant.com

RESPECTING THE

ENVIRONMENT

AN ENVIRONMENTALLY FRIENDLY COMPANY

Well aware of the environmental stakes, Dickson launched a major campaign under the banner of its GreenOvation initiative. By optimising its energy management, minimising the use of chemical substances and obtaining the ISO 14001 (Environmental Management) - ISO 45001 (Health and Safety at work) - ISO 9001 (Quality Management) - ISO 50001 (Energy Management) certificates and the CAP 26000 (Social Responsibility) label, Dickson has clearly established its position as an eco-friendly business that cares about curbing its environmental footprint as much as possible.

0% PHTHALATE

To improve the well-being of users, air quality and indoor comfort, the woven upper layer of our Dickson floor coverings has always been phthalate-free.

As we believe quality materials play a vital role in their environment, the challenge presented by this new collection for our R&D department was to successfully produce flooring with 0% phthalate - including the bottom layer.

This commitment to remove controversial substances from our new collection reflects Dickson's innovation approach to the environment and complies with European REACH standards.

FLOORSCORE CERTIFICATION

Good indoor air quality is essential because people spend most of their lives indoors. The air we breathe affects both our health and our well-being, from minor disturbances, such as odours, skin and eye irritations, to the development or aggravation of more serious ailments, such as respiratory allergies.

Independently tested and certified by the Resilient Floor Covering Institute (RFCI), Dickson® flooring meets the official emissions criteria for volatile organic components (VOC) and is recognized as contributing to good indoor air quality.

A DESIGNER COLLECTION

Drawing on more than one hundred and eighty years of know-how and internationally renowned expertise, Dickson has developed a collection of woven flooring made using revolutionary fibres. The combination of warp and weft yarns on the wear side allows users to create different looks and colour nuances for varying perspectives depending on the intensity of the light.

Thanks to a range of available shapes and a palette of unique colours, it has never been easier to create your own style and make your flooring the cornerstone of your decorative scheme in which the floor is the canvas on which you express your creativity and the flooring is a work of art.

INSPIRED BY NATURE

BORÉAL WOVEN FLOORING BY DICKSON

Boréal was conceived as a celebration of the grandeur and prestige of a noble and timeless material of excellence: marble. Every graphic detail has been carefully considered to convey the essence and richness of this natural material. Its majestic scale makes Boréal an extraordinary landscape, ready to sublimate the environments it adorns.

ÉLÉGANCE WOVEN FLOORING BY DICKSON

Élégance, with its delicately velvety texture, now welcomes seven new references, with a focus on optimism and sustainability, which will gracefully contribute to making your environments unique and convivial. We've drawn on nature's repertoire of sunny beiges and plant greens for the gentle energy and serenity they convey, and because we're convinced they'll appeal over the long term.

Our Dickson flooring is composed of PVC-coated woven polyester monofilaments joined to a technically advanced soundproofing underlayer by heat setting and coating. Heat action, central to our production process, fuses each element of our product together for advanced wear resistance and perfect dimensional stability. A subtle amalgam of polymers is discernable on the wear side, but does not alter the quality of our product.

The woven structure also gives added character to the flooring surface and naturally plays with the light. The shape, colour and layout give your flooring depth and subtle nuances of colour depending on your perspective and the intensity of the light.

www.dicksonflooringproject.com

Each room raises new challenges. That's why our

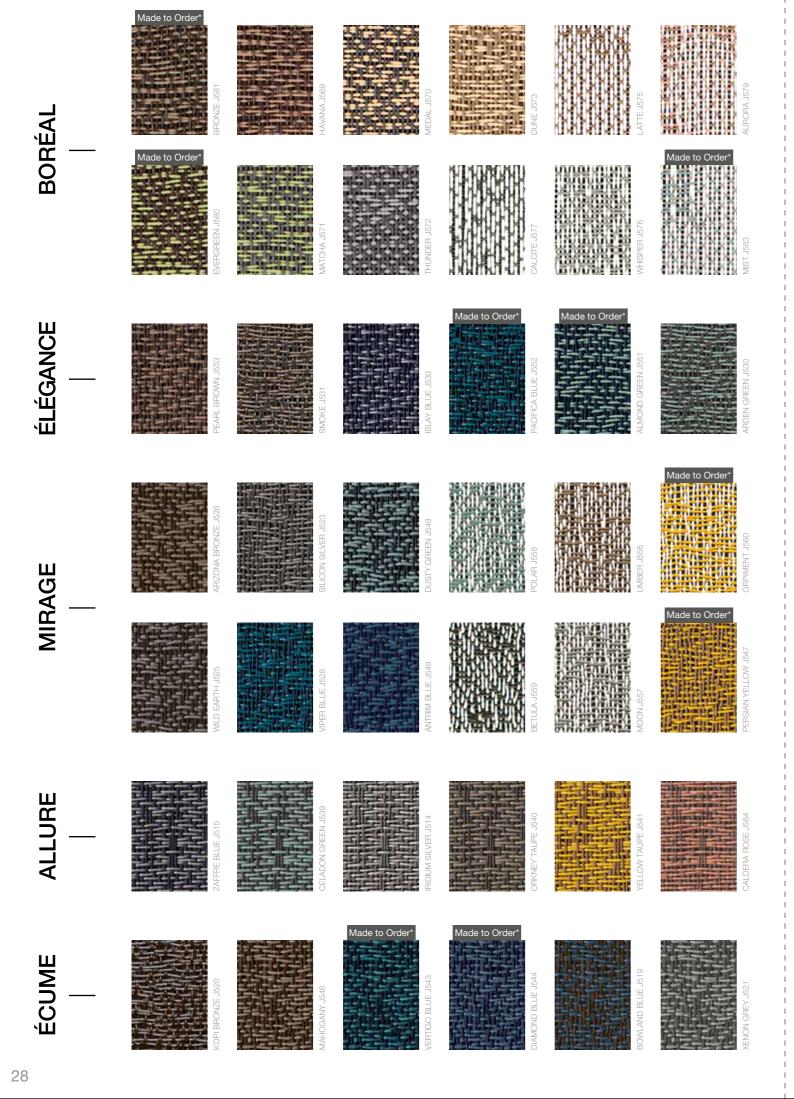

CONFIGURATOR ALLOWS UNPRECEDENTED SCOPE FOR TESTING AND MODULATING FLOOR SURFACES

From offices to hotels to homes, each space is unique, and so are your design choices. Now available to order in multiple shapes, Dickson Woven Flooring offers countless layout possibilities. Free yourself from standard layouts or complement them by mixing references and shapes to create rhythm, perspectives and reflections to transform interiors.

Allow your imagination free rein by playing with lighting, textures and reflections. With our ranges and their palette of unique colours to choose from, create your own rules and transform your flooring into a design feature.

Your floor becomes

A FORM OF CREATIVITY, FLOORING AN ART FORM.

This colour is made to order - minimum of order 200 m²

⁽¹⁾ All our ranges can be combined together for your projects. A slight difference in thickness, due to the different structures of the woven side, is possible and cannot exceed 0.6 mm.

⁽²⁾ Dickson flooring is a textile product, composed on the surface of warp threads aligned and associated with weft threads, by the weaving technique. The perfect perpendicularity of the warp and weft threads does not exist. Therefore, woven vinyl floors will always present natural warp and/or weft deformations that will accentuate the authentic appearance of the weave. Recognizing that this natural phenomenon can alter the final aesthetic result beyond a certain limit, Dickson has set a tolerance for all of its woven flooring lines. Weft deformation: Dickson Flooring tolerance limit = 2%. Visual aspect: our Dickson flooring is composed of a weave of PVC-coated polyester monofilaments combined with an acoustic and technical undercoat by heat-setting and coating. The action of heat, at the heart of our products on the different elements of our products to melt together, thus ensuring their resistance to wear and tear and perfect dimensional stability. Thus, the discrete amalgam of polymers can be detected on the wear side without altering the quality of our products in any way. In addition, the woven structure adds character to the look of your flooring and naturally plays with the light. Varying with the shape, colour and layout pattern, the deep and subtle hues of your flooring change according to the lighting and perspective.
